

3.89 M parameters

spatial ViT 1.93 M | temporal ViT 1.78 M

landmark MLPs 0.09 M · geometry MLP 0.04 M · head 0.05 M · embeddings 4 k

4-bit release: groups of 128 weights, one FP16 scale per group · 1.97 MiB

Output layers of the hand, pose and geometry MLPs start at zero, so training begins as a crops-only model and learns to use the side inputs.
